Integrated Studies

The aim of a successful Integrated Studies program is to expose the children to a variety of learning experiences and for them to view these as integrated and relevant to their everyday lives.

Integrated Studies is taught from Prep through to Grade 6 and is timetabled into the class program. All classes study the same topics with a different focus for each level. These topics include Our Community, Our Country—Australia, Our World, Health and Nutrition, The Human Body, Weather and Life as a Scientist.
